

WHAT'S NEW?

IO2 - European Welder Updated Guideline

The "Update of the European Welder curriculum" is the second WELD 4.0 project outcome that proposes an update of the European Welder Guideline to account for the inclusion of the new chapter on the 4th Industrial Revolution and its impact on the welding sector.

As part of this chapter a new ICT-based Tool was developed aiming to boost digital skills of trainees, both youngsters and older personnel seeking further training.

IO3 - Development of WELD 4.0 Tools

WELD 4.0 project's innovative ICT tool is a training solution created to combine real-life welding processes with a game-based learning environment. It collates observable behavior indicators of what the user (welding trainee) does and assesses his/her performance, providing detailed feedback towards achieving the required European Welder updated course learning outcomes.

UPCOMING EVENTS

Industry Awareness National Events

Scheduled to occur between September and October 2019, the Industry Awareness National Events will be carried out in UK, Germany and Portugal and aim to present the WELD 4.0 ICT tool and the developed dissemination materials to companies and industry stakeholders. The main objective is to inform them on how these outcomes can be used to qualify their own personnel.

CONSORTIUM: **HIGHSKILLZ** **BIBA** **iSQ** **EWF**

This Event will be held on October 24th 2019 in Bremen (Germany), simultaneously with the Final Project Meeting, and will bring together between 30 and 40 participants from the Industry, belonging to other EU and international countries. Its main goals are to present WELD 4.0 project's outcomes and its achievements, to promote networking between participants and to gather their feedback on the project results' applicability.

"Curious to know more about the first activities and outcomes of the project? Access the first WELD 4.0 Newsletter, available on the project's website"
